

Post Graduate Syllabus in Economics (Under Choice Based Credit
System) Department of Economics Madhabdev University
Narayanpur -784164 Assam

The Post Graduate Programme in Economics shall be of four-semester covering two academic years.

The Course Structure

The M.A. Programme in Economics shall be of minimum 80 credits, distributed unevenly in 4 Semesters.

The Programme is divided into a number of courses.

Core Courses: These Courses include compulsory components of the M.A. Programme in Economics and are to be compulsorily studied as a core requirement for the Programme. All Core Courses shall be of 4 (four) credits each. A total of 12 Core Courses are offered which are distributed equally in the four semesters.

Elective Courses: Elective courses shall be chosen by each student from a pool of courses. The Courses shall be of 4 (four) credits each. The Elective Courses shall be of two types:

Discipline Specific Elective (DSE): These courses shall be intra-departmental. At least one course, out of a basket of DSE courses, shall be chosen by each student in each semester.

Generic Elective (GE): These Courses shall be interdepartmental/ inter-disciplinary. The students shall have to opt for at least 2 (two) courses from other departments according to his/ her area of interest. These courses are offered in 2nd and 3rd semesters.

Ability Enhancement Courses (AEC): The Ability Enhancement Courses shall be inter-disciplinary in nature and shall be of 2 (two) credits. The students shall have to opt for at least 2 (two) courses according to his/ her area of interest. These courses are offered in 1st and 3rd semesters.

The M.A. Programme in Economics shall be governed by the Madhabdev University Regulations for the Post Graduate Programmes in the Choice Based Credit System.

COURSE STRUCTURE

Keeping in reference the UGC PG Curriculum and Credit Framework the research component is included in the last year of two year PG Programme.

Semester	Courses with Credit								Credit
	Core Course		Elective				AEC		
			DSE		GE				
Code	Title	Code	Title	Code	Title	Code	Title		
I	PECC101	Microeconomic Analysis – I	PECD101	Agricultural Economics	----	----	ECNAEC101	Foundations of Social Science Research	18
	PECC 102	Macroeconomic Analysis	PECD 102	Economics of Social Sector					
	PECC 103	Mathematics for Economic Analysis	PECD 103	Basic Demography					
II	PECC 201	Microeconomic Analysis – II	PECD 201	Demographic Analysis	ECNGE201	Issues of Indian Economy	----	----	20
	PECC 202	Monetary Theories and Policy	PECD 202	Operations Research					
	PECC 203	Statistical Foundations of Econometrics	PECD 203	Gender Economics					
III	PECC 301	International Economics	PECD 301	Econometric Methods	ECNGE301	Basic Econometrics	ECNAEC301	Research Methodology	22
	PECC 302	Economics of Growth and Development - I	PECD 302	Financial Economics					
	PECC 303	Public Finance	PECD 303	Industrial Economics					
IV	PECC 401	Indian Economy	PECD 401	Rural Development and Management	Project is Compulsory of 4 credits				20
	PECC 402	Economics of Growth and Development -II	PECD 402	Environmental Economics					
	PECC 403	Regional Economics	PECD 403	Labour Economics					

SEMESTER I

Course Code : PECC101
Title of the Course : Microeconomic Analysis – I
Type of the Course : Core Course
Number of Credits : 4
Marks : 100 (In-Semester: 40 +End-Semester: 60)

Unit	Topics	No. of Lecture Hours
I	<p>The Theory of Consumer Behaviour-I: A Review of Indifference Curve Analysis; Revealed Preference Hypothesis; the Slutsky Equation; Ordinary and Compensated Demand Curves; Indirect Utility Function and Roy's Identity; Duality in Consumption.</p> <p>The Theory of Consumer Behaviour-II: Consumer Behaviour Under Risky and Uncertain Situations: Uncertainty, Probabilities and Expected Values; Fair Gambles; The St. Petersburg Paradox and Bernoulli's Hypothesis; Neumann-Morgenstern Method of Constructing Utility Index Under Risky Situations ; Risk Lover, Risk Averter And Risk Neutral Persons; Friedman-Savage Hypothesis.</p>	16
II	<p>Theories of Production and Costs: The Production Function for a Single Product Firm: Basic Concepts; Homogeneous and Non-Homogeneous Production Functions - Cobb- Douglas (C.D.) and Constant Elasticity of Substitution (C.E.S.), Variable elasticity of substitution, Ideas of partial and total factor productivity. Production Function - Short-Run and Long-Run Analysis of Production - Returns to Scale and Returns to a Factor Choice of Optimal Factor Combination: Constrained Profit Maximization and Optimal Expansion Path - Production Possibility Curve and Equilibrium of the Multi-Product Firm.</p> <p>Derivation of Cost Functions from Production Functions, Traditional vs. Modern Theory of Costs; Economies of Scale - the Relevance of the Shape of Costs in Decision Making Envelope theorem</p>	16
III	<p>Pricing in Product Market: A Review of Equilibrium of the Firm and Industry under Perfect Competition, Monopolistic Competition and Monopoly - Effect of Imposition of a Tax under Perfect Competition and Monopoly - Monopoly and Its Regulation - the Multi-Plant Firm</p> <p>Oligopoly Models: Non-Collusive Oligopoly- Cournot's Duopoly Model, Bertrand's Duopoly Model, and Stackelberg's Duopoly Model - Kinked-Demand Curve Model, Collusive Oligopoly- Cartels Aiming at Joint Profit Maximisation and Market-Sharing Cartels - Price Leadership Models.</p>	16

IV	An Introduction to the Theory of Games: Basic Concepts, Objectives and Applications; Classification of Games depending upon Number of Players, Sum of Gains and Losses, and, Strategy; Competitive Games: Two-Person Zero-Sum Games; Pure and Mixed Strategies ; Rules of Dominance and Iterated Deletion of Dominated Strategies; Solution of Games with and without Saddle Point; Two Person, Non-Constant- Sum Games: Cooperative Games and Nash Bargaining Solution; Non-Cooperative Games and Prisoners' Dilemma.	16
Total		64

Reading List:

1. Baumol, W.J.: Economic Theory and Operations Analysis, Prentice Hall of India Private Limited
2. Henderson, J.M. & Quandt, and R.E.: Micro Economic Theory, McGraw Hill.
3. Maddala, G.S. and Miller, E.: Microeconomics, Theory and Applications; McGraw Hill
4. Pindyck, R.S., Rubinfeld, D.L. & Mehta: Micro Economics, Pearson Education
5. Salvatore. D.: Micro Economics, Theory and Applications, Oxford University Press.
6. Hall varian: '*Micro Economic Analysis*,' Viva
7. Snyder and Nicholson: '*Micro Economics- Basic principles and Extensions*' Cengage learning

Course Code : PECC 102
Title of the Course : Macroeconomic Analysis
Type of the Course : Core Course
Number of Credits 4
Marks : 100 (In-Semester: 40 +End-Semester: 60)

Unit	Topics	No. of Lecture Hours
I	General Framework of Macroeconomic Analysis: IS-LM Model Brief review of classical and neo-classical economic systems; Keynesian system: Theory of effective demand, output and employment determination, theory of interest; Policy evaluation under the Keynesian system - IS-LM Framework: IS curve and good market equilibrium, LM curve and money market equilibrium, General equilibrium. Evaluation of policies in IS-LM model	10
II	General Framework of Macroeconomic Analysis: AD-AS model The Keynesian Aggregate demand schedule; the Aggregate Supply curve; Determination of the aggregate price level; A contractual view of the Labour market – sources of wage rigidity; the Keynesian aggregate supply schedule; Shocks to the aggregate demand and supply schedules; Price adjustments; the Classical dichotomy; Keynes vs. classical. Supply Side Economics: Distinguishing features, policy implications of supply side economics. Objections against Supply- Side Economics	12
III	Open Economy Macroeconomics The international flows of capital and goods; the Trade balance; the Balance of Payments; Exchange rates: Real vs nominal, Policy effects on exchange rates; Fixed vs flexible exchange rates; Policy framework in an open economy – The Mundell-Fleming model; Interest rate differentials; The Mundell-Fleming model with a changing price level.	10
IV	New –Macro Economics New Classical Macroeconomics- Rational Expectations Hypothesis and Policy Ineffectiveness; Sellers’ Misperception and Non-Neutrality of Money; Real Business Cycle Theory. New-Keynesian Macroeconomics- Keynesian Counter Critique, Wage- Price Rigidity-Menu Cost Hypothesis, Efficiency Wage Hypothesis. The Random Walk of GDP.	12
V	Behavioural Foundations of Macro Economics Consumption and Saving: Consumption Puzzle, The Life Cycle and The Permanent Income Hypotheses. Ricardian Equivalence: Efficacy of Policy Action. Hall’s Random Walk Hypothesis and its Implications. Theories of Investment Demand: the Accelerator Theories of Investment; the Neoclassical Theory of Investment; q-Theory of Investment.	12
VI	Macroeconomic Policy Debates Monetary Policy Rules – Taylor rule, Monetary policy rules; The Macroeconomic Policy Model; Should Policy be active or passive; Discretionary policy vs. rule based policy.	8
Total		64

Reading List:

1. N. G. Mankiw: Macroeconomics, Pearson.
2. A. B. Abel and B. S. Bernanke: Macroeconomics, Pearson
3. Dorndusch, Fischer and Startz: Macroeconomics, Tata McGraw Hill.
4. Richard T. Froyen: Macroeconomics, Pearson
5. Errol D'Souza: Macroeconomics, Pearson
6. David Romer: Advanced Macroeconomics, 4th edition, McGraw Hill, 2012

Additional Readings:

1. Sunil Bhaduri: Macroeconomic Theory, New Central Book Agency.
2. Soumyen Sikdar: Principles of Economics, Oxford.

Course Code : PECC 103
Title of the Course : Mathematics for Economic Analysis
Type of the Course : Core Course
Number of Credits : 4
Marks : 100 (In-Semester: 40 +End-Semester: 60)

Unit	Topics	No. of Lecture Hours
I	Sets, Set Operations, Convex Set – Properties, Relations and Functions: Different forms of functions and their graphs – Limit and Continuity of functions. Differentiation – Definition and Basic rules of differentiation – derivative of implicit functions – application of derivative in case of elasticity, revenue function, cost function and derivation of other marginal functions – Application to comparative static analysis of market model and national income model.	10
II	Unconstrained optimization – Optimization with single explanatory variable – Applications to Cost minimisation, Revenue maximisation, Profit maximisation and Equilibrium of firm, Partial Differentiation; Optimisation with more than one explanatory variable –Economic Application. Constrained optimization – Optimization with equality constraint – Lagrange’s multiplier method – Application to consumer’s equilibrium and producer’s equilibrium in factor market.	10
III	Integration – Basic rules of integration – Definite integral – Application to Economic problems – Derivation of total function from marginal function – Consumer’s surplus and producer’s surplus.	10
IV	Dynamic Analysis – I: First Order Differential Equation and solution – Application to dynamic stability of market, First Order Difference equation and solution – Application to Cobweb model. Dynamic Analysis – II: Second Order Differential Equation and solution – application to dynamic stability of market; Second Order Difference equation and solution.	12
V	Elements of Matrix Algebra – Determinants, their evaluation and properties, Solution of Simultaneous equations, Input-Output analysis – Structure of an input-output model – Static open input-output model – Solution – Hawkins – Simon conditions, Pricing – dynamic input – output model, linkage analysis – Income multiplier, Output multiplier.	10
VI	Optimal Control Theory Calculus of variation and optimal control problem, control, state, and co-state variables, Hamiltonian – current value and present value, transversality conditions; Economic applications.	12

Course Code : PECD 101
Title of the Course : Agricultural Economics
Type of the Course : Discipline Specific Elective Course
Number of Credits : 4
Marks : 100 (In-Semester: 40 +End-Semester: 60)

Unit	Topics	No. of Lecture Hours
I	Agriculture and the Economy Agriculture and Economic Development, Interdependence between agriculture and industry, Changing importance of agriculture; Agriculture in the macro economy; Theories of Agricultural Development- Transformation of traditional agriculture- Theories of Mellor, Boserup, Lewis, Fie- Ranis and Schultz; Organizational aspects of farming- Traditional, Commercial, co-operative, contract and state farming, Problems of organization; Conditions of Indian Peasantry	16
II	Agricultural production- Production relationship-Factor Product Relationship, Returns of scale, Stages of rational and irrational production; Factor-factor relationship- Problem of allocation and substitution of resources; least cost combination; Product-product relationship- Basic relationship, Optimum combination of two products; Production Function; Farm efficiency; Risks and uncertainty in agriculture; Structural change in agricultural production; Size productivity debate in agriculture;Agricultural Mechanization; Economic Impacts of Agricultural Research and Extension measures.	16
III	Agricultural Product market and marketing of agricultural produce Product market: Demand and supply of agricultural products, Demand for agricultural products- Factors affecting demand for food, Supply behaviour of agricultural products- Individual and aggregate supply of farm products; Behaviour of agriculture price- Cobweb Cycles; Instability of farm prices- Agriculture price policy; Agricultural marketing- Approaches to agricultural marketing; Problems of agricultural Marketing ; Price spread; Marketing margin; Marketing efficiency; Market integration; Institutions and organizations in agricultural markets; Food processing.	16
IV	Factor market in Agriculture Agricultural Factor Market: Role of land, labour and capital in Farming; Land and lease Market: land rental contracts, Tenancy and efficiency, Labour market- labour categories, Nutrition and labour market; Credit Market- Characteristics of rural credit market, Theories of informal credit markets; Type and sources of credit; Rural credit in India; Agricultural insurance; Inter-linkages between land, labour and capital markets; Emerging factor market in Indian agriculture.	16
Total		64

Reading lists

1. Subba Reddy, P.Raghu Ram, T.V. Neelakanta Sastry and I. Bhavani Devi(2008): '*Agricultural Economics*' Oxford
2. Sadhu, A.N. & A. Singh: *Fundamentals of Agricultural Economics*, Himalaya publishing House, Bombay.
3. Soni, R.N.: *Leading Issues in Agricultural Economics*, Sobhanlal Nagin Chand & Co. Jalandhar
4. Debraj Ray(2012) : '*Development Economics*' Oxford India
5. Basu, Kaushik : '*Agrarian Questions*' Oxford India
6. Bruch L. Gardner and Gordon C. Rausser : *Handbook of Agricultural Economics*, North Holland

Course Code : PECD 102
Title of the Course : Economics of Social Sector
Type of the Course : Discipline Specific Elective Course
Number of Credits : 4
Marks : 100 (In-Semester: 40 +End-Semester: 60)

Unit	Topics	No. of Lecture Hours
I	Health Economics and Development Rationale and Scope of Health Economics; Investment in Health; Health outcomes and their relationship with macroeconomic performance; Health and Productivity Relation: Empirical Evidence; Economics of Nutrition.	10
II	Determinants and Indicators of Health Determinants of Health Status; Indicators of Health Status: Input and Output Indicators; Measures of Health Status: Disease Burden - DALY, QALY; Consequences of Gender Bias in Health; Concept of Missing Women; Linkages of Female Education with mortality and morbidity. Health outcomes; health care delivery systems and health financing: Public-Private Partnership in Providing health care services: Equity and Efficiency debate; Evolution of health care policies in India. Cross Country Comparisons in terms of health care investment and health outcomes	15
III	Health Care Market Demand for Health care – Grossman model of health demand; Supply of Health Care; Economics of Health Insurance: Market failure in health insurance and sources; Market of Pharmaceuticals	13
IV	Introduction to Economics of Education: Concept and scope of Economics of Education; Education as consumption and investment goods; Role of education in Economic development, Human Capital- Human Capital Vs Physical Capital, Demand and Supply of Education; Cost of education- private costs and social cost, direct and indirect cost; Benefits of education-Direct and indirect benefits, private and social benefits; inequality in education; the Relationship between Employment Opportunities and Educational Demand.	13
V	Financing of Education: Private versus public provision of education, Empirical evidence on the determinants of public versus private funding, Interactions between public and private sector, Centralization versus decentralization of educational finance, Fiscal federalism in education finance.	13

Course Code : PECD 103
Title of the Course : Basic Demography
Type of the Course : Discipline Specific Elective Course
Number of Credits 4
Marks : 100 (In-Semester: 40 +End-Semester: 60)

Unit	Topics	No. of lecture hours
I	Basics of demography and Sources of demographic data: Meaning and subject matter of demography; Linkage between economics and demography; Sources of demographic data –Population census, Vital registration system, Sample Registration System, Sample surveys- features, advantages and problems, Population register.	10
II	Theories of population: Pre-Malthusian view, Malthusian theory of population, Optimum theory of population, Demographic transition theory, Marx’s theory.	12
III	Components of population change Fertility: Basic concepts of fertility; Fertility Theories: Social Capillarity theory, Theory of change and response, Theory of diffusion; Economic Theories of fertility - Cost-benefit theory, Theory of micro-consumption, Easterlin Hypothesis; Biological theories of Spencer, Sadler and Doubleday, Basic measures of fertility: Crude birth rate, General fertility rate, Age-specific fertility rate, Total fertility rate. Mortality – Basic concepts, Mortality variables, Basic measures of mortality: Crude death rate, Infant mortality rate, Maternal mortality rate; Health outcomes and their relationship with economic performance. Migration – Basic concepts, Theories of migration: The Push-pull hypothesis, Lee’s theory, Petersen’s typology, Ravenstein’s laws of migration, Stouffer’s theory of intervening opportunities, Zipf’s Gravity Model, Harris-Todaro model, Sjaastad’s human capital model of migration.	20
IV	Population Growth and projection: Population, Development and environment linkages; Population growth rates – inter-censual, arithmetic, geometric and exponential growth rates; Concepts of population projections; Population estimates, forecasts and projection; Uses of population projection, Economic importance of projection; methods of population projections; Methods of rural-urban and sub-national population projections; ; Population policy-meaning and importance.	10
V	Population Composition and Distribution Age structure, Factors affecting age structure, Aging of population; Measures of age structure; Sex structure - Factors affecting sex structure, Measures of sex structure, Population pyramid; Economic characteristics-LFPRs; Marital and educational characteristics; Meaning of population distribution; Population density, Factors affecting population density.	12
Total		64

Reading List:

9. Cox, P. R.: Demography, Cambridge University Press
10. Jay Weinstein & V. K. Pillai: Demography – The Science of Population, Pearson

Course Code : PECAEC101
Title of the Course : Foundations of Social Science Research
Type of the Course : Ability Enhancement Course
Number of Credits : 2
Marks : 50 (In-Semester: 20 +End-Semester: 30)

Unit	Topics	No. of lecture hours
1	Foundations of Research Methodology: Meaning and characteristics of research, Importance of research, Objectives of research, Types of research, Research methodology and research methods; Research process, Ethics in research.	10
2	Planning of Research: Identification of research problem; Primary and secondary data – usefulness and problems; Primary data – Census and Sample survey; Sampling techniques – probability and non-probability sampling and their merits and demerits.	12
3	Analysis of Data: Univariate and bivariate analysis – cross tabulation; Hypothesis – Meaning, types; Qualities of a good hypothesis; Steps involved in hypothesis testing; Errors in hypothesis testing; Report writing.	10
Total		32

Readings List:

1. Good and Hatt : Methods in Social Research, McGraw Hill.
2. Panels P. Forcesses : Social Research Methods, Prentice Hall.
3. Paul Oliver : Writing your Thesis, Vistaar Publication, New Delhi.
4. Panneerselvam, R : Research Methodology, PHI, New Delhi.
5. Johnston, J & Dinardo : Econometric Methods, McGraw Hill.
6. Maddala, G.S : Econometrics, McGraw Hill.
7. Rajaram, V. : Fundamentals of Computers, PHI, New Delhi.
8. Studenmund : Using Econometrics- A Practical Guide, Addison Wesley.

SEMESTER II

Course Code : PECC 201
Title of the Course : Microeconomic Analysis – II
Type of the Course : Core Course
Number of Credits : 4
Marks : 100 (In-Semester: 40 +End-Semester: 60)

Unit	Topics	No. of Lecture Hours
I	Theories of Firm: Traditional Vs. Modern Theories of Firm, Managerial Theory of Firm: Baumol's Model of Sales Revenue Maximization - Williamson's Model of Managerial Discretion - Marris Model of Managerial Enterprise. Theory of Limit Pricing: Models of Bain, Sylos-Labini, Modigliani and Bhagawati - Baumol's Contested Market Model Inter-temporal Choice: Discounting and Present Values; Choice of Investment Projects - Inter-temporal Consumption Decisions - Inter-temporal Production Decisions - Determination of the Rate of Interest; Applications.	16
II	The Economics of Information: Markets with Asymmetric Information; Quality Uncertainty and the Market for Lemons. Adverse Selection; Social Insurance; Signaling and Screening; Moral Hazard; The Principal-Agent Problem. Asymmetric Information in Labour Markets: Efficiency Wage Theory.	16
III	General Equilibrium Analysis : Partial vs. General Equilibrium Analysis; the Walrasian Model: Problem of Existence, Stability and Uniqueness of an Equilibrium; Tatonnement; Pareto Criterion: Efficiency in Exchange, Efficiency in Production and Efficiency in Product-Mix; Non-Walrasian Equilibrium: Non-tatonnement process, Rationing equilibria, Effective demand, Micro foundations of macro economics	16
IV	Welfare economics: Kaldor-Hicks Compensation Criterion; Social Welfare Function; Maximization of Social Welfare; Determination of Welfare Maximizing Output-Mix, Commodity Distribution, and Resource Allocation; Welfare Maximization and Perfect Competition. Social Choice: Contributions of Arrow and Sen; Market Failure; Externalities and Public Goods.	16
Total		64

Course Code : PECC 202
Title of the Course : Monetary Theories and Policy
Type of the Course : Core Course
Number of Credits 4
Marks : 100 (In-Semester: 40 +End-Semester: 60)

Unit	Topics	No. of lecture hours
I	Money and the economy: Demand for money – Classical approach, Keynesian approach, Baumol’s theory, Tobin’s theory, Friedman’s theory; Money in the utility function; Neutrality of money, Dichotomy between the real and monetary sectors, Pigou effect, Real balance effect.	16
II	Money, inflation and unemployment: Measuring inflation – price indices and deflators, High inflation and hyper inflation; Laffer curve and the inflation tax, Monetary transmission mechanism; Inflation and unemployment – Phillips Curve, Inflationary expectations – Monetarists view, New Classical Economics, New Keynesian counter critique; Economic cost of unemployment, inflation targeting.	16
III	Business Cycle: Characteristics of business cycles, Theories of business cycles - Multiplier-accelerator theories of Samuelson and Hicks, Schumpeter’s theory, Cobweb theory, Real business cycle theory, Political business cycle theory.	16
IV	Monetary Policy: Components of money supply, Money multiplier, Monetary policy goals and instruments, Targets in monetary policy, Tradeoff between Money Supply and interest rate targeting, Policy lags, Effectiveness of monetary policy and fiscal policy, Role of monetary policy and fiscal policy in open economy – Mundell-Fleming Model.	16
Total		64

Reading List:

1. Keith Bain and Peter Howells : *Monetary Economics – Policy and its Theoretical Basis*, Palgrave Macmillan
2. Jagdish Handa: *Monetary Economics* , Routledge
3. R.E. Hall and D.H. Papell: *Macroeconomics*, W.W. Norton and company.
4. C. R. McConnel and S. L. Brue: *Macroeconomics – Principles, Problems and Policies*, McGraw-Hill Irwin
5. Richard T. Froyen: *Macroeconomics*, Pearson
6. Soumyen Sikdar: *Principles of Macroeconomics*, Oxford.
7. Dorndusch, Fischer and Startz: *Macroeconomics*, Tata McGraw Hill.

Course Code : PECC 203
Title of the Course : Statistical Foundations of Econometrics
Type of the Course : Core Course
Number of Credits : 4
Marks : 100 (In-Semester: 40 +End-Semester: 60)

Unit	Topics	No. of Lecture Hours
I	Probability and Distribution – Random Variables- Discrete and Continuous, Probability Mass Function and Probability Density Function, Rules of probability, Mathematical Expectation, Discrete and Continuous distributions- Binomial distribution, Poisson distribution and Normal distribution.	9
II	Sampling distribution and Statistical Inference – Statistic and Parameter, Estimator & Estimate, Characteristic of a good estimator, Sampling distribution of an estimator, Point estimation, Interval estimation, Testing of hypothesis: Type I and type II errors, one-tailed and two-tailed tests; Level of Significance and Degrees of Freedom; χ^2 and F distributions.	9
III	Linear Regression Model – Principles of least squares - Two-Variable Linear Regression Model, BLUE – The Gauss–Markov Theorem – Extension to Multi-Variable Linear regression Model, R^2 and Adjusted R^2 Prediction & Forecasting; Introduction to Maximum likelihood estimation, Dummy Variable.	12
IV	Single Equation Problems – I: Auto-Correlation, Heteroscedasticity – Problem, Detection and Alternative Methods of Estimation – Generalised Least Square Method, Properties of GLS Estimators	12
V	Single Equation Problems – II: Multicollinearity, Errors in Variable and Specification Errors – Problems, Detection and Alternative Methods of Estimation.	12
VI	Qualitative Response Model – Models with binary dependent variables- LPM, Introduction to Logit and Probit.	10

Course Code : PECD 201
Title of the Course : Demographic Analysis
Type of the Course : Discipline Specific Elective Course
Number of Credits 4
Marks : 100 (In-Semester: 40 +End-Semester: 60)

Unit	Topics	No. of lecture hours
I	Fertility: Basic concepts of fertility, Intermediate variables, Proximate determinants of fertility, Socio-economic determinants of proximate variables; Importance of fertility studies; Measures of fertility – Crude Birth Rate, General Fertility Rate, Age-specific Fertility Rate, Total Fertility Rate, Gross Reproduction Rate, Net Reproduction Rate, Order Specific Fertility Rate, Marital Fertility Rate, Child Woman Ratio, Standardized Birth Rate, Completed fertility rate; Coale’s fertility indices.	16
II	Mortality: Mortality – Basic concepts, Need and importance of mortality study; Measures of mortality – Crude Death Rate, Age-specific Death Rate, Infant Mortality Rate, Neo natal Mortality Rate, Post Neo Natal Mortality Rate, Cause Specific Death Rate, Maternal Mortality Rate, Monthly Death Rate, Fetal wastage-Fetal death rate, Perinatal Mortality Rate; Standardized death rate - Direct and indirect standardization; Life table – types of life tables, uses of life table and its construction.	16
III	Migration and Urbanization: Basic concepts, Problems of measuring migration, Factors affecting migration, Push-pull hypothesis, Consequences of migration on both places; Migration rates and ratios; Estimation of migration – Direct estimation of migration, Indirect measures of migration – Vital statistics method, National growth rate method, Survival ratio method; Urbanization – Definition of an urban area, Measures of urbanization, Concentration and dispersion in urban area.	16
IV	Quality of demographic data Sources of demographic data; Errors and omissions in demographic data, Sources of errors, Post-enumeration surveys, Dual Record System, Techniques of evaluation of age data - Whipple’s index, Myers’ Blended index, Digit preference Quotients for birth intervals, UN Joint Score or Accuracy index.	16

10. Jay Weinstein & V. K. Pillai: Demography – The Science of Population, Pearson

Course Code : PECD 202
Title of the Course : Operations Research
Type of the Course : Discipline Specific Elective Course
Number of Credits 4
Marks : 100 (In-Semester: 40 +End-Semester: 60)

Unit	Topics	No. lecture hours
I	Linear Programming: Definition, significance, scope and limitations of Operations Research; Linear Programming: Assumptions, formulation and solution by graphic method and simplex methods; Duality in LP programming and its economic interpretation, difference between primal and dual, dual simplex method; Sensitivity analysis; Some special cases: unbounded solution, infeasibility, multiple optimal solution.	14
II	Transportation problem and Assignment problem: Transportation problem, mathematical model of transportation problem, the transportation method. Methods for finding initial solution Tests for optimality; Assignment problem: Different approaches to finding solution.	12
III	Non-Linear programming: Non-Linear programming, Mathematical formulation; Concepts of global minima and local minima; Lagrange multipliers and Kuhn-Tucker conditions; Duality in non-linear programming; Integer programming: Algorithms for integer programming	14
IV	Game Theory: Competitive games, Pure strategy, by Dominance, Mixed strategy (2x2, mx2 and 2xm), Two persons zero sum games, 'n' persons zero sum games, Solution of Game problems with Linear Programming: Graphical methods and Simplex method.	12
V	Queuing Models, PERT and CPM: Basic nature and characteristics; Queuing system and problems; Queue models and solutions: Probabilistic queuing model, Deterministic queuing model and Mixed queuing model. Program evaluation and Review technique: PERT and CPM	12

2. Sharma J.K.: "Operations Research:Theory and application",S. Chand, second edition
3. Chiang, Alpha C. (2005): "Fundamental Methods of Mathematical Economics", 4th edition, McGraw-Hill.
4. Natarajan, Balasubramani and Tamilarasi: "Operations research" Pearson

Course Code : PECD 203
Title of the Course : Gender Economics
Type of the Course : Discipline Specific Elective Course
Number of Credits 4
Marks : 100 (In-Semester: 40 +End-Semester: 60)

Unit	Topics	No. of lecture hours
I	Introduction to Gender Economics: Meaning, Rationale, Scope An Economic Approach to Marriage, Fertility and Family—Empirical Issues; Issues relating to Gender and Development: Economic growth and gender equality; Globalisation and gender status; Feminisation of poverty; Women’s contribution to GDP; The Demographic Transition and Gender Impacts	16
II	Gender factor in household economics: Gender and time distribution: work in the labour market, work in the household, and leisure time. Demographic factors in time budget differences. Gender and Household Decision Making : Gender, Bargaining Power and Intra-Household Distributions	16
III	Labor Market Inequalities: Occupation Segregation, Gender division of work; Invisibility of women’s work; Women’s Labor Force Participation: Historical and Current Trends ; The Gender Gap in Earnings: Theoretical Issues, Human Capital explanation for Gender Gap in earnings and Empirical Evidence.	16
IV	Gender Analysis and Public Policy : Gender Policy at national, regional and global level: History, Objectives, and Results; Gender Budgeting; Gender and the Sustainable Development Goals.; Measuring Gender Gaps: GDI, GII, GGI, GEM.	16

SEMESTER III

Course Code : PECC 301
Title of the Course : International Economics
Type of the Course : Core Course
Number of Credits : 4
Marks : 100 (In-Semester: 40 + End-Semester: 60)

Unit	Topics	No. of lecture hours
I	Basis of trade and gains from trade: Comparative advantage and trade, Heckscher-Ohlin, Stolper-Samuelson theorem, Specific factors model, Leontief paradox; Technological gap model, Product cycle theory, Overlapping demand theory, Vertical specialization-based trade, the gravity model.	16
II	Economic growth, trade and International factor movement: Economic growth and terms of trade; Bhagwati's theory, Technological progress and terms of trade, Factor growth and terms of trade; Reasons for international capital movement, Foreign portfolio investment (FPI) and Foreign direct investment (FDI), Determinants of FDI, Theory of FDI, Effects of international capital movement, Benefits and costs of FDI to home and host countries; Motives for labour migration, Economic effects of labour movements.	16
III	Trade policy: Economic and non-economic arguments for protection, Partial equilibrium effects of an import tariff, General equilibrium effects of an import tariff, Optimum tariff; Non-tariff barriers, Effects of import quota, Quota versus tariff for a large and small nation; Economic integration – theory of Customs Union, Optimum currency area, WTO and international trade.	16
IV	Balance of Payments and Exchange Rate: Balance of Payments – current and capital account; Exchange rate – equilibrium exchange rate, spot and forward rates, Currency swaps, Foreign exchange risks, Hedging and speculation, Interest arbitrage and foreign exchange markets, Monetary approach to balance of payments and exchange rate, Asset market model and exchange rate; Exchange rate and balance of payments; Exchange rate, domestic prices and terms of trade; International monetary system – Bretton Woods System, Operation of the present system.	16

6. J.D. Daniels, L.H. Radebaugh & D.P. Sullivan: *International Business*, Pearson Education
7. Rana, K.P. and Verma, K.N.: International Economics, Vishal Publishing Company, Jalandhar

Course Code : PECC 302
Title of the Course : Economics of Growth and Development - I
Type of the Course : Core Course
Number of Credits : 4
Marks : 100 (In-Semester: 40 + End-Semester: 60)

Unit	Topics	No. of Lectures
Unit – I	Economic Development: An Overview Emergence of Development Economics as a Discipline; Development in historical perspective; Perpetuation of underdevelopment – Vicious circle of poverty, structural view of underdevelopment; Proximate versus fundamental causes of growth ; Economic performance of the developing countries (Case study of India, Brazil, East Asian countries, and China); Overview of the World Economy: Indicators of development, international comparisons of countries.	15
Unit – II	Measuring Development: Measurement of development: Conventional, HDI, GDI, MPI and other quality of life indices. Broadening of development economics: Basic needs, capabilities and human development. Capabilities and Development: From economic development to human development, growth-development divergence, development as freedom.	12
Unit-III	Economic Growth: Basic features of modern economic Growth; Growth models- Harrod-Domar model, Solow-Swan model; Absolute and Conditional Convergence; Golden Rule of Accumulation; Total Factor Productivity; Augmented Solow Model. Models of Endogenous Growth: AK model, Endogenous Technical Change; Romer Model, Models of Schumpeterian Growth.	15
Unit – IV	Alternative theories of Development: Dependencia Theories of Development; The Neoclassical Counterrevolution; Dualism, Centre- periphery models and the process of cumulative causation.	10
Unit – V	Population Growth and the Constraint of Natural Resources: World Population Growth through History, Demographic Transition; Economic theories of population growth (Malthus model, Optimum theory of population and the microeconomic theory of household); theories of resource constraint on Economic growth: Malthus to the Club of Rome, the Ricardo model and the dual economy model; Ways to break the natural resource constraints: Harris Todaro Model of Urban Migration; Interrelation between population, development and environment, sustainable development; population as 'Limits to Growth' and as 'Ultimate Source'.	12

Course Code : PECC 303
Title of the Course : Public Finance
Type of the Course : Core Course
Number of Credits : 4
Marks : 100 (In-Semester: 40 + End-Semester: 60)

Unit	Topics	No. of Lecture Hours
I	Government and the Economy Major Economic Functions of the Government: Establishing the legal framework for the market economy, the allocation function, the distribution function, the stabilization function. Public-Choice Theory: Meaning, outcomes of collective choice, the choice process – unanimity, majority rule, cyclical voting and the voting paradox, Arrow’s theorem.	6
II	Public Goods and Externalities Private versus public goods, club goods, local public goods; externalities and inefficiency of externalities, remedies for externalities.	6
III	Taxation Tax Incidence : Partial equilibrium view of product and factor taxes, incidence in general equilibrium, modern views on incidence, measure of incidence. Excess Burden of Tax : Meaning and types, demand supply elasticity and excess burden, neutrality, efficiency and equity of taxation, the Laffer curve. Optimal Taxation : Commodity tax and income tax.	11
IV	Public Expenditure and Public Debt Public Expenditure : The classical theory of minimum expenditure, principle of maximum social advantage, Lindahl’s model of voluntary exchange, Samuelson’s theory of public expenditure, the Tiebout hypothesis. Public Debt : Burden of public debt, debt burden and future generation - capital stock transfer theory, welfare attitude theory, intergeneration equity theory; Safe limits of public debt, public debt management, public debt as a means of regulating the economy, public debt and economic growth.	15
V	Budget System and Policy Classical and modern theories of government budgeting, budget framing, incremental budgeting and zero base budgeting, programme and performance budgeting, budget as an instrument of economic policy, Budgetary policy in India – study of Union Budgets.	11
VI	Fiscal Policy and Fiscal Federalism Fiscal Policy : Classical, Neo-classical and modern views on fiscal policy; contra-cyclical and compensatory fiscal policy, limitations of fiscal policy; integration of monetary and fiscal policies. Fiscal reform measures in the context of India’s New Economic Policy. Fiscal Federalism: Principles of federal finance, inter-government resource transfer, advantages and limitations of decentralization. Centre-State Financial Relations – the Indian experience: An overview.	15

Course Code : PECD 301
Title of the Course : Econometric Methods
Type of the Course : Discipline Specific Elective Course
Number of Credits 4
Marks : 100 (In-Semester: 40 + End-Semester: 60)

Units	Topics	No. of Lecture Hours	No. of Practical Hours
1	The General Linear Regression model in multivariable framework- Assumptions; Least squares estimators; Gauss-Markov theorem; Significance tests and confidence intervals; Concepts of simple R-square, Adj. R-square and modified R-square; predictions; Maximum likelihood estimators. Model selection criteria.	13	-
2	Qualitative and Limited Dependent Variable Models Models with Binary Dependent Variables – The LPM, The Probit model, The Logit Model for binary variable; Maximum Likelihood estimation of Logit model; Multinomial Logit models; Conditional Logit models; Ordered Choice models; Models for count data; Limited Dependent Variable models – Censored regression and Truncated regression.	13	8
3	Time Series Analysis Importance of time series analysis – Stationary and Non-stationary time series – Univariate time series processes: AR, MA, ARMA and ARIMA – Estimation of AR, MA and ARMA models. Estimation and testing of ARIMA model – Economic forecasting – Box-Jenkins approach. Multivariate time series techniques: Vector Auto Regression – Problems with VAR – Exogeneity and Causality analysis; Random Walk Model – Problem of UNIT Root – UNIT Root Test – Co-integration – Test for co-integration. Vector Auto Regression and Cointegration – Cointegration and Error Correction model – Estimation of Vector Error Correction Model	13	8
4	Simultaneous Equation models Seemingly unrelated regressions; Simultaneous equation model and Recursive model; Problem of Identification: Structural form approach and reduced form approach; Conditions for identification; Method of estimation in simultaneous equation model: Indirect Least Square, 2-Stage Least Squares; three stage least squares; Full Information Maximum Likelihood methods. Panel data models: Panel Data and its importance – Types of Panel data – Panel Regression: Fixed effect model; Random effect model.	13	8

Course Code : PECD 302
Title of the Course : Financial Economics
Type of the Course : Discipline Specific Elective Course
Number of Credits : 4
Marks : 100 (In-Semester: 40 +End-Semester: 60)

Unit	Topics	No. of Lecture Hours
I	Financial System: Meaning and Functions; Financial Markets: Money Market and Capital Market; Financial Assets: Debt, equity, derivatives; Financial Market Rates: Interest Rates, Rates of Return on Risky Assets, Market Indexes and Market Indexing, Financial Intermediaries: Banking and Non Banking Intermediaries Financial Infrastructure and Regulation.	16
II	Allocation of Resources over Time : Present Value and Future Value of Single Cash Flow and Multiple Cash Flows and Investment Decisions; Annuities : PV and FV of Annuities, Perpetual Annuities, Investing in Preferred Stock, Loan Amortization, Exchange Rates and Time Value of Money, Inflation and Discounted Cash Flow Analysis, Inflation and Investment Decisions, Taxes and Investment Decisions	10
III	Market Valuation of Assets: Valuation of Debt Instruments: Pure Discount Bonds, Coupon Bonds: Current Yield and Yield to Maturity; Behaviour of Bond Prices over Time, Valuation of Shares of Stock: Valuation of a preferred stock, Valuation of Common Stocks- Discounted Dividend Model: Zero Growth, Constant Growth and Multiple Growth Models, Linkage between Share Price, Earnings and Dividends, The significance of Price-Earnings Ratio (P/E) The law of One Price and Arbitrage	14
IV	Risk Transfer and Portfolio Theory: Risk Transfer: Hedging : Forward and Future Contracts, hedging foreign exchange risk with swap contracts; Insuring- Basic Features of Insurance Contracts, Options as Insurance, The Derivative Market: Traders in a Derivative Market; Hedgers, Speculators and Arbitrageurs. Diversifying; Portfolio Theory for Optimal Risk Management: Probability Distributions of Returns, Standard Deviation as a Measure of Risk, Trade-off Between Expected Risk and Return: Efficient Portfolio, Markowitz Mean- Variance Portfolio Theory; Capital Asset Pricing Model: Use of CAPM in Portfolio Selection	16
V	Corporate Finance: Structure of the financial statements of the firm: Balance Sheet, Income Statement, Statement of Cash Flows, Financial Ratios, Internal Vs. External Financing, Equity Financing, Debt Financing, the Modigliani-Miller theorem.	8

Course Code : PECD 303
Title of the Course : Industrial Economics
Type of the Course : Discipline Specific Elective Course
Number of Credits : 4
Marks : 100 (In-Semester: 40 +End-Semester: 60)

Unit	Topics	No. of Lecture Hours
I	Introduction to Industrial Economics: Meaning, scope, need and significance of the study on Industrial Economics, A revision of the concepts of Firm, Industry, Market, Market structure, Market power, Market conduct and Market performance, Market concentration and Monopoly Power	10
II	Industrial Organisation and Industrial Expansion The organizational form and alternative motives of the firm – Types of organizational form – private, joint and public sector, choice of organizational form, Business motives – profit maximization, sales maximization, maximization of growth, maximization of value, managerial motivations. Industrial Expansion – Diversification, Vertical Integration and Merger – Meaning - Types - Motives for Diversification, Vertical Integration and Merger, Measurement approaches	12
III	Pricing and Investment Decision: Theoretical considerations; Pricing in Practice – Cost-plus pricing ,Variable cost pricing , Target rate of return pricing, Acceptance pricing, Going rate pricing, Group pricing, Menu pricing, Bundling; Pricing in Public Enterprises Nature and Type of Investment Decisions – Methods of Project Evaluation –Pay back method, NPV and IRR, Social cost-benefit analysis, Risk and Uncertainty in Project Appraisal, Replacement decision, Inventory Investment, Market Investment	12
IV	Industrial Finance and Accounting: Need for finance, Types of Finance – short term and long term, sources of finance – internal and external, Commercial and Development Bank, choice of funding – internal vs external sources Accounting – Need for accounting, Basic accounting procedure – balance sheet, profit and loss account – cost of capital – depreciation accounting – cost accounting	10
V	Industrial Location Analysis and Industrial Efficiency: Factors affecting Industrial Location , Approaches to industrial location analysis – Central place theory – Renner's theory – Rawstron's principles, Economic theories of Industrial Location – Weber's theory – Market area theory – Central place theory, Operational approaches to industrial location Industrial Efficiency – Productive efficiency and Economic efficiency	10
VI	Indian Industrial Sector: Evolution of Indian industries, Industrial policy in India, Globalization, Small scale industries, Industrial sickness, Empirical evidences on mergers and acquisitions and diversification, Industrial locational trends in India, Regional imbalance, Patent policy in India	10
Total		64

Readings:

8. Studenmund : Using Econometrics- A Practical Guide, Addison Wesley.

SEMESTER IV

Course Code : PECC 401
Title of the Course : Indian Economy
Type of the Course : Core Course
Number of Credits : 4
Marks : 100 (In- Semester: 40, End- Semester: 60)

Unit	Topics	No. of Lecture Hours
I	Development Strategy and Growth Development strategies since independence; Pre and Post Liberalisation period- an assessment of performance, major aspects of transformation and recent developments.	8
II	Population and Economic Development Population as a factor of economic development, Age and Sex Composition, the quality of population, Demographic Dividend; Occupational Structure- Symptoms of change; The problem of poverty and unemployment.	8
III	Agriculture Sector Land relations and land reforms, Green revolution, Modern farm inputs, The Problem of Food Security: Public Distribution System, Agricultural Subsidies, Agricultural prices and marketing, Diversification of Agriculture, Agricultural and rural credit, Agriculture and environment, WTO and agriculture.	14
IV	Industry and Services Sector Strategy of Industrial development: Industrial Policy Reforms; Reservation Policy relating to small scale industries, Competition policy, Sources of industrial finance, Identification of industries having India's Comparative Advantage: IT Industry, MSME; Industrial sickness, privatization and disinvestments; Services sector: Importance of the Services Sector in India, Performance of the Services sector, Services led growth- sustainability.	14
V	Economic Reforms Reform in Capital Market: Inflow of FDI and FPI and its Implication for the Domestic Economy; Financial Sector Reform; Fiscal Reform: FRBM Act and its Implication.	10
VI	India's External Sector Reforms in External sector, Direction of Foreign Trade, Composition of Foreign Trade, Recent changes in Foreign Trade Policy , Balance of Payments: Role of Private Transfer, Software Services and Foreign Capital in BOP, Current and Capital Account Convertibility; WTO, TRIPS and GATS	10

Course Code : PECC 402
Title of the Course : Economics of Growth and Development - II
Type of the Course : Core Course
Number of Credits : 4
Marks : 100 (In- Semester: 40, End- Semester: 60)

Unit	Topics	No. of Lecture hours
Unit – I	Institutions, Political Economy and Growth: Institutions- Role of institutions in economic development; Geography, History and Culture and their affect on economic performance through institutions; Inclusive and Extractive institutions, Inefficient institutions ; Approaches to political economy of development- Radical, Mainstream and Institutional; Political aspect of development- Governance and economic development, Democracy and economic development; political institutions and economic growth.	14
Unit – II	Market , State and the Community: The economic functions of the market and the state- efficiency of the competitive market, market failure, Role of the state; Government failure; Choice of economic system; rise and fall of Developmentalist Models; Success and failure of the new developmental market economies; Resurgence of market liberalism and its consequences; From the Washington Consensus to the Post Washington consensus; Role of Community in economic development.	12
Unit – III	Factors in The Development Process: Importance of agriculture and industry in economic development; Technical Progress; Choice of techniques and appropriate technology; Investment criteria – Elementary idea of cost – benefit analysis; Trade and Economic development- Foreign Aid; Globalization and LDC's; Objectives and role of monetary and fiscal policies in economic development.	14
Unit – IV	Concepts and Measurement of Poverty: Measures of poverty- Head-count; Foster –Greer- Thorbecke, Sen; Critique of the poverty line approach; Absolute vs. Relative Poverty; Millennium Development Goals and Poverty; Poverty traps, Multi-dimensional measures of Poverty: MPI; Poverty as capability failure; Poverty and under nutrition; poverty and environment; Policies to tackle Poverty: Macro vs. Micro Interventions; Targeting vs. Universalism; Micro-credit.	12
Unit – V	Inequality: Causes and measures of income inequality, Lorenz curve, Gini Co-efficient, Concentration ratio, Entropy; Growth-Inequality and Poverty debate, Patterns and Changes in inequality and poverty- the inverted U hypothesis, Inequality and capitalism in the twenty-first century, the rise of global middle class and global plutocracy; Inequality within and among countries; Measures to reduce inequality; Inclusive Growth	12
